

## Ohio: Top Power Plant Carbon Polluters

For over forty years, the Environmental Protection Agency (EPA) has used the Clean Air Act to hold polluters accountable and successfully protect the health of millions of Americans – including our children, seniors, and the most vulnerable among us – from dozens of different air pollutants. Cleaning up our air has also protected wildlife from harmful pollution that threatens species directly and contaminates water, degrades habitats, and damages the environment.

The National Wildlife Federation, on behalf of our over four million members and supporters nationwide, stands with a broad coalition of public health, environmental, business, labor, faith, and sportsmen organizations in support of the Clean Air Act and in strong opposition to any attempts to weaken its protections. It is critical that the EPA continue its important work of reducing air pollution in this country by setting strong limits on all pollutants, including carbon pollution, as required by the Clean Air Act. It is time for our nation's polluters to finally be held accountable for their harmful air pollution that contributes to climate change.

Power Plant/Owner	Location	Carbon Emissions <sup>1</sup> (MT CO <sub>2</sub> e)	Mercury (Hg) Emitted <sup>2</sup> (lbs)
Gen J M Gavin/American Electric Power (AEP)	Cheshire, OH	16,872,856	2,099
J M Stuart/Duke Energy	Aberdeen, OH	13,119,068	1,234
W H Sammis/FirstEnergy	Stratton, OH	11,864,716	597
Cardinal/AEP	Brilliant, OH	9,307,450	894
W H Zimmer Generating Station/Duke Energy	Moscow, OH	8,323,838	198
Miami Fort Generating Station/Duke Energy	North Bend, OH	7,933,941	205
Conesville/AEP	Conesville, OH	6,434,616	814
Kyger Creek/Ohio Valley Electric Co.	Cheshire, OH	6,281,231	452
Muskingum River/AEP	Beverly, OH	6,034,810	505
Eastlake/FirstEnergy	Eastlake, OH	5,884,875	331

**1 million Metric Tons (MT) of CO<sub>2</sub>e emissions is the equivalent of burning about 112 million gallons of gasoline.<sup>3</sup>**

<sup>2</sup>Total 2010 emissions from EPA's TRI Explorer. [http://iaspub.epa.gov/triexplorer/tri\\_release.chemical](http://iaspub.epa.gov/triexplorer/tri_release.chemical)

<sup>3</sup>Gallons of gasoline equivalency provided by EPA's Greenhouse Gas Calculator. <http://www.epa.gov/cleanenergy/energy-resources/calculator.html>

Recently, the Environmental Protection Agency finalized **new air pollution standards** that will reduce dangerous mercury pollution for power plants by 91%. But the job of controlling other air pollution from these sources is far from done. Unchecked carbon pollution that causes climate change is fundamentally altering our environment and putting fish and wildlife populations and our outdoor heritage at risk.

Now the EPA is in the process of taking common-sense steps to crack down on big power plant polluters. New clean air standards limiting carbon pollution from power plants and other industrial smokestacks are essential to safeguard wildlife, improve public health, and protect our kids from dangerous air pollution by improving air quality.
